

Dear eClaimLink Users,

As promised during the eRx Provider and Payer training sessions, a testing environment has been prepared for you to train your staff and get more familiar with the e-Prescription process and system prior to the mandate on January.1.2014.

Testing Environment:

Test URL: <http://qa.eclaimlink.ae/>

(click on 'Continue to this website (not recommended)' - this will not be harmful to your computer.)

- Testing Environment web services are identical to the Production Environment web-services for users communicating directly to the DHPO.

Test Dataset: (find attached)

- Test Members – Please enter the correct Member ID\Birth Date combination. Configured to give a covered member response if the covered DDC code is used.
- Test Drugs – you can utilize all the DDC drugs, but the ones within this list will produce an accepted result if used with one of the Test Members on the list.

Providers:

- Facility Login – login using your own credentials from the real eClaimLink site.
- Clinicians – use your credentials from the facility that you have on the eClaimLink site.
- Test Payer – make sure to send only to this Test payer in order to get a response.

Payers:

- Send us a request to grant you a provider access account. This is done to avoid overlap of provider testing accounts between payers.
- Send transactions to your own PayerID using this test provider.
- Utilize test members.
- Utilize any DDC drug based on your system configurations.

Best Regards,

Information Desk Officer
